EPA TO-4A sampling and analysis protocol

If you need more information we will be happy to provide it.

This is mostly baseline and process test data, the only active spray sample we have run to date (see Francis Eatherington) came up empty.

As you will notice in the sample analysis reports, all of the sample analyses to date have been run twice by different analysts, EMP and TGT.

We will be running more active spray samples in the next month or so, we were hoping to get some applicator spray information on two of the sites but the spray applicators are not cooperating to date.

And we plan more active spray site sampling in the fall.

Thank you,

Gary, Jan, Eron, Justin, Dan and Marijana
